Home Learning

I had some great feedback last FUN FRIDAY so today I thought we would keep the same approach. So you have a very fun and creative day ahead of you. I hope you have all had a fantastic week. Thank you all for the lovely emails and congratulations, it really means a lot! Have a super day.

Mrs Wolfreys

Today is: Friday 3rd July

Today's project: Design your perfect bedroom

So with two new babies on the way, I have been thinking a lot about what their bedroom should look like. So I would like your help! Today I would like you to design your perfect bedroom, this might give me some ideas on what I need to include for the babies!

There are so many things you can think about when designing your bedroom and how you could make it. Here are some of my ideas:

- Think about where it might be. This is your perfect bedroom so it might not be in a house. Maybe it is a tree house or in a castle. It could be underwater or in a ninja cave!
- Think about how big your bedroom needs to be.
- What would you have inside your room? Toys, a slide to get downstairs from the window, your favourite people, maybe even some animals!
- Don't forget the important things you need in a bedroom too – bed, a space to keep your clothes and toys and a door
- How will you decorate your bedroom? Will you have colours, wallpaper or maybe decorations hanging from the ceiling

So, if I was doing this project this is what I would do:

1. Talk about all of our ideas and write/draw them down
2. Decide where my bedroom is going to be
3. Plan out my bedroom as a drawing, thinking about sizes and shapes of different things (place to play, toy storage, bed (I would have a hammock!), anything else you want in there)

4. I would then draw or make some of the things for my bedroom. I might try and make my bed from an egg box or design my wall paper on some paper.
5. I might then try to create my bedroom. I think I would make mine inside a shoe box.

Learning you could include:

- Shape and size work for maths
- Counting and measuring
- Fine motor skill work in creating and building things
- Social skills in working together
- Creative and critical thinking skills – what is going to be the best approach?
- Building resilience if something doesn't work
- Literacy skills – drawing, sounding out, telling stories about what the bedroom
- Attention and concentration levels – to stay on one task for a longer period of time

I hope you enjoy this project and have lots of fun with it. There is no right or wrong way, so be creative! I have included some photos of different types of bedrooms which may give some inspiration.
